DIRECTA (UK) LTD

### TECHNICAL DATA SHEET:

PRODUCT: Our Reference No. 02009AVCK

DESCRIPTION: Cellulose Tape

TECHNICAL DETAILS: A clear, strong cellulose film release coated for easy unwind and with a high tack adhesive suitable for a multitude of domestic and industrial applications and for sealing cartons and packages of every description.

Thickness:                    0.045mm  
Adhesion:                    1050g/24mm (10.2N/24mm)  
Tensile Strength:            11kg/24mm (106.3N/24mm)  
Elongation:                    20%  
Standard Roll Lengths: 33 metres, 66 metres, 132 metres  
Core Size:

For 33 metres: 25mm

For 66 metres: 76mm

Standard Widths 66 and 132 metre: 9mm, 12mm, 15mm, 18mm,  
21mm, 24mm, 36mm, 48mm, 72mm

33 metre: 12mm 15mm 18mm 24mm

Except where indicated otherwise, the above figures are average values and should not be regarded as maximum or minimum values for specification purposes. The company reserve the right to improve products and change specifications which may alter performance. We advise the customer to test the material required to ensure the suitability of intended application.

### HEALTH & SAFETY

'Directa' Cellulose Tapes are produced using a strong, bio-degradable transparent film, coated with a rubber/resin solvent based pressure sensitive adhesive.

Under normal circumstances, these tapes may be regarded as non-toxic and would not normally be hazardous on contact with skin. However, common standards of personal hygiene should be observed, i.e. wash hands after use and before handling or taking food. These tapes have not been tested for medical purposes and therefore should not be used as bandages, medical plasters or for hand protection. No special precautions need be taken in respect of storage or transportation but care should be taken to ensure the absence of sources of ignition in storage areas. Cellulose

Tapes will burn in a general fire and give off Carbon Monoxide and Carbon Dioxide together with irritating fumes and smoke. Breathing apparatus should be used in the case of a fire.

Suitable disposal methods may be by burying on an approved site or by incinerating under controlled conditions using equipment with special fume filters. Please refer to National and Local Regulations regarding waste disposal.

This information is based on current knowledge and experience. Its purpose is to describe our tapes in terms of Health and Safety requirements and should not be treated as a specification.
