DIRECTA (UK) LTD

TECHNICAL DATA SHEET:

PRODUCT: Our Reference 067, 075 and E75 Pallet Wrap (Blown Film)

DESCRIPTION: A tough and durable product used to secure your boxes in place when on a pallet, it also provides a waterproof protection for your goods.

STOCK WIDTH: 400mm

STOCK LENGTH: 300m

STOCK THICKNESSES: 14, 17, 20, 23 and 34 Micron

SKILLET WRAP AVAILABLE IN: 100mm X 150m OTHER SIZES AVAILABLE ON REQUEST

MATERIAL: Mono Blown Polythene Film. Extruded from granule type raw materials.

ADDITIVES: Tack - To give the film one-sided cling and various colour masterbatches (i.e. Blue, Yellow, Green).

TOXICITY: Generally regarded as being biologically inert.

INHALATION: There is no release of any obnoxious fumes at the ambient temperatures.

INGESTION: Should be avoided, base materials can be considered harmless but certain additives and masterbatches may contain ingredients that could be harmful if swallowed.

FLAMMABILITY: If the product is heated in air, melting will occur at around 180 DC - 230 DC. When heated above 300C the film will Produce Carbon Monoxide and Water plus various Hydrocarbons and Aldehydes and the involved gases may ignite.

PHYSICAL CONTACT: Normally does not lead to skin irritation.

STORAGE CONDITIONS: Should be in dry location avoiding extremes of temperature.

WASTE: Film is re-cyclable (NOT BIO-DEGRADABLE)

FOOD CONTACT: Not to be used directly onto food products but can be used in food manufacturing environments. Any further information relating to the film specification, i.e. micron, yield sizes and packaging specifications will be supplied on request.
ALL ROLLS ARE MADE TO P.I.F.A. STANDARDS
