DIRECTA (UK) LTD

TECHNICAL DATA SHEET:

PRODUCT: Our Reference No. 012, 013, 014

DESCRIPTION: Pipe Identification Tape

<u>TECHNICAL DETAILS</u>: S/A printed vinyl tape laminated with S/A clear polypropylene film. 012 Coloured P.I.D. is floodcoated to British Standard colour specifications. 013/014 is either black print on white or clear of recognised texts used in the building trade today.

Widths: 50mm, 100mm, 150mm

Length: 33m Thickness: 0.108mm

Adhesion: 700g/24mm (6.8N/24mm) Tensile Strength: 11kg/24mm (106.3N/24mm)

Heat Resistant To: 70 deg C.

Except where indicated otherwise, the above figures are average values and should not be regarded as maximum or minimum values for specification purposes. The company reserve the right to improve products and change specifications which may alter performance. We advise the customer to test the material required to ensure the suitability of intended application.

HEALTH AND SAFETY

Unplasticised PVC films are used for the manufacture of Vinyl Tapes, coated with a solvent based pressure sensitive adhesive.

Under normal circumstances, these tapes may be regarded as non-toxic and would not normally be hazardous on contact with skin. However, common standards of personal hygiene should be observed, i.e. wash hands after use and before handling or taking food. These tapes have not be tested for medical purposes and therefore should not be used as bandages, medical plasters or for hand protection.

No special precautions need be taken in respect of storage or transportation but care should be taken to ensure the absence of sources of ignition in storage areas. PVC Tapes will burn in a general fire and give off Hydrogen Chloride, Carbon Monoxide and Carbon Dioxide together with irritating fumes and smoke. Breathing apparatus should be used in the case of a fire.

Suitable disposal methods may be by burying on an approved site or by incinerating under

controlled condtions using equipment with special fume filters. Please refer to National and Local Regulations regarding waste disposal.

This information is based on current knowledge and experience. Its purpose is to describe our tapes in terms of Health and Safety requirements and should not be treated as a specification.
