## Deltec Masking tape Extreme

### Product Description

Special reinforced rice paper masking tape, especially suited for obtaining very sharp lines (no paint bleed). Specially developed for slightly rough and moist surfaces. The ideal tape for the professional painter and plasterer. Deltec Masking tape Extreme is UV resistant up to 4 months and therefore usable both in- and outdoors. The tape can be removed without leaving any (glue) residue.

### Applications

- masking of surfaces to be painted or plastered
- for obtaining very sharp lines
- usable under tough conditions
- suitable for both in- and outdoor usage due to the UV resistance

### Technical features

Total thickness	: 100 µ
Carrier	: special reinforced rice paper
Adhesive	: acrylic
Elongation at break	: 8 %
Temperature resistance	: up to 100°C (20 min.)
Colour	: red
Storage conditions	: cool and dry (15 – 21°C)

### Advantages / features

- superior quality
- resistant against temperatures of 100°C
- high adhesion
- very strong, doesn't tear when removed
- leaves no glue residue after removal (up to 4 months)
- excellent resistance to UV radiation
- suitable for both in- and outdoor usage
